UIImageview

Label

Table View  
Prototype Content

Diagram illustrating the navigation flow in the storyboard:

- The root view controller is a Table View (Prototype Content).
- A segue connects it to a Detail view controller.
- The Detail view controller contains a UIImageView and a Label.
- A segue connects the Detail view controller to a DetailViewController.swift view controller.
- The DetailViewController.swift view controller displays a portrait of a man with glasses and a beard.

# PART 1 - COLLABORATION

- Let's talk about collaboration.
- Developers want to write code
- Developers really should not do design

# GITHUB FOR THE DESKTOP

- Clone the repository

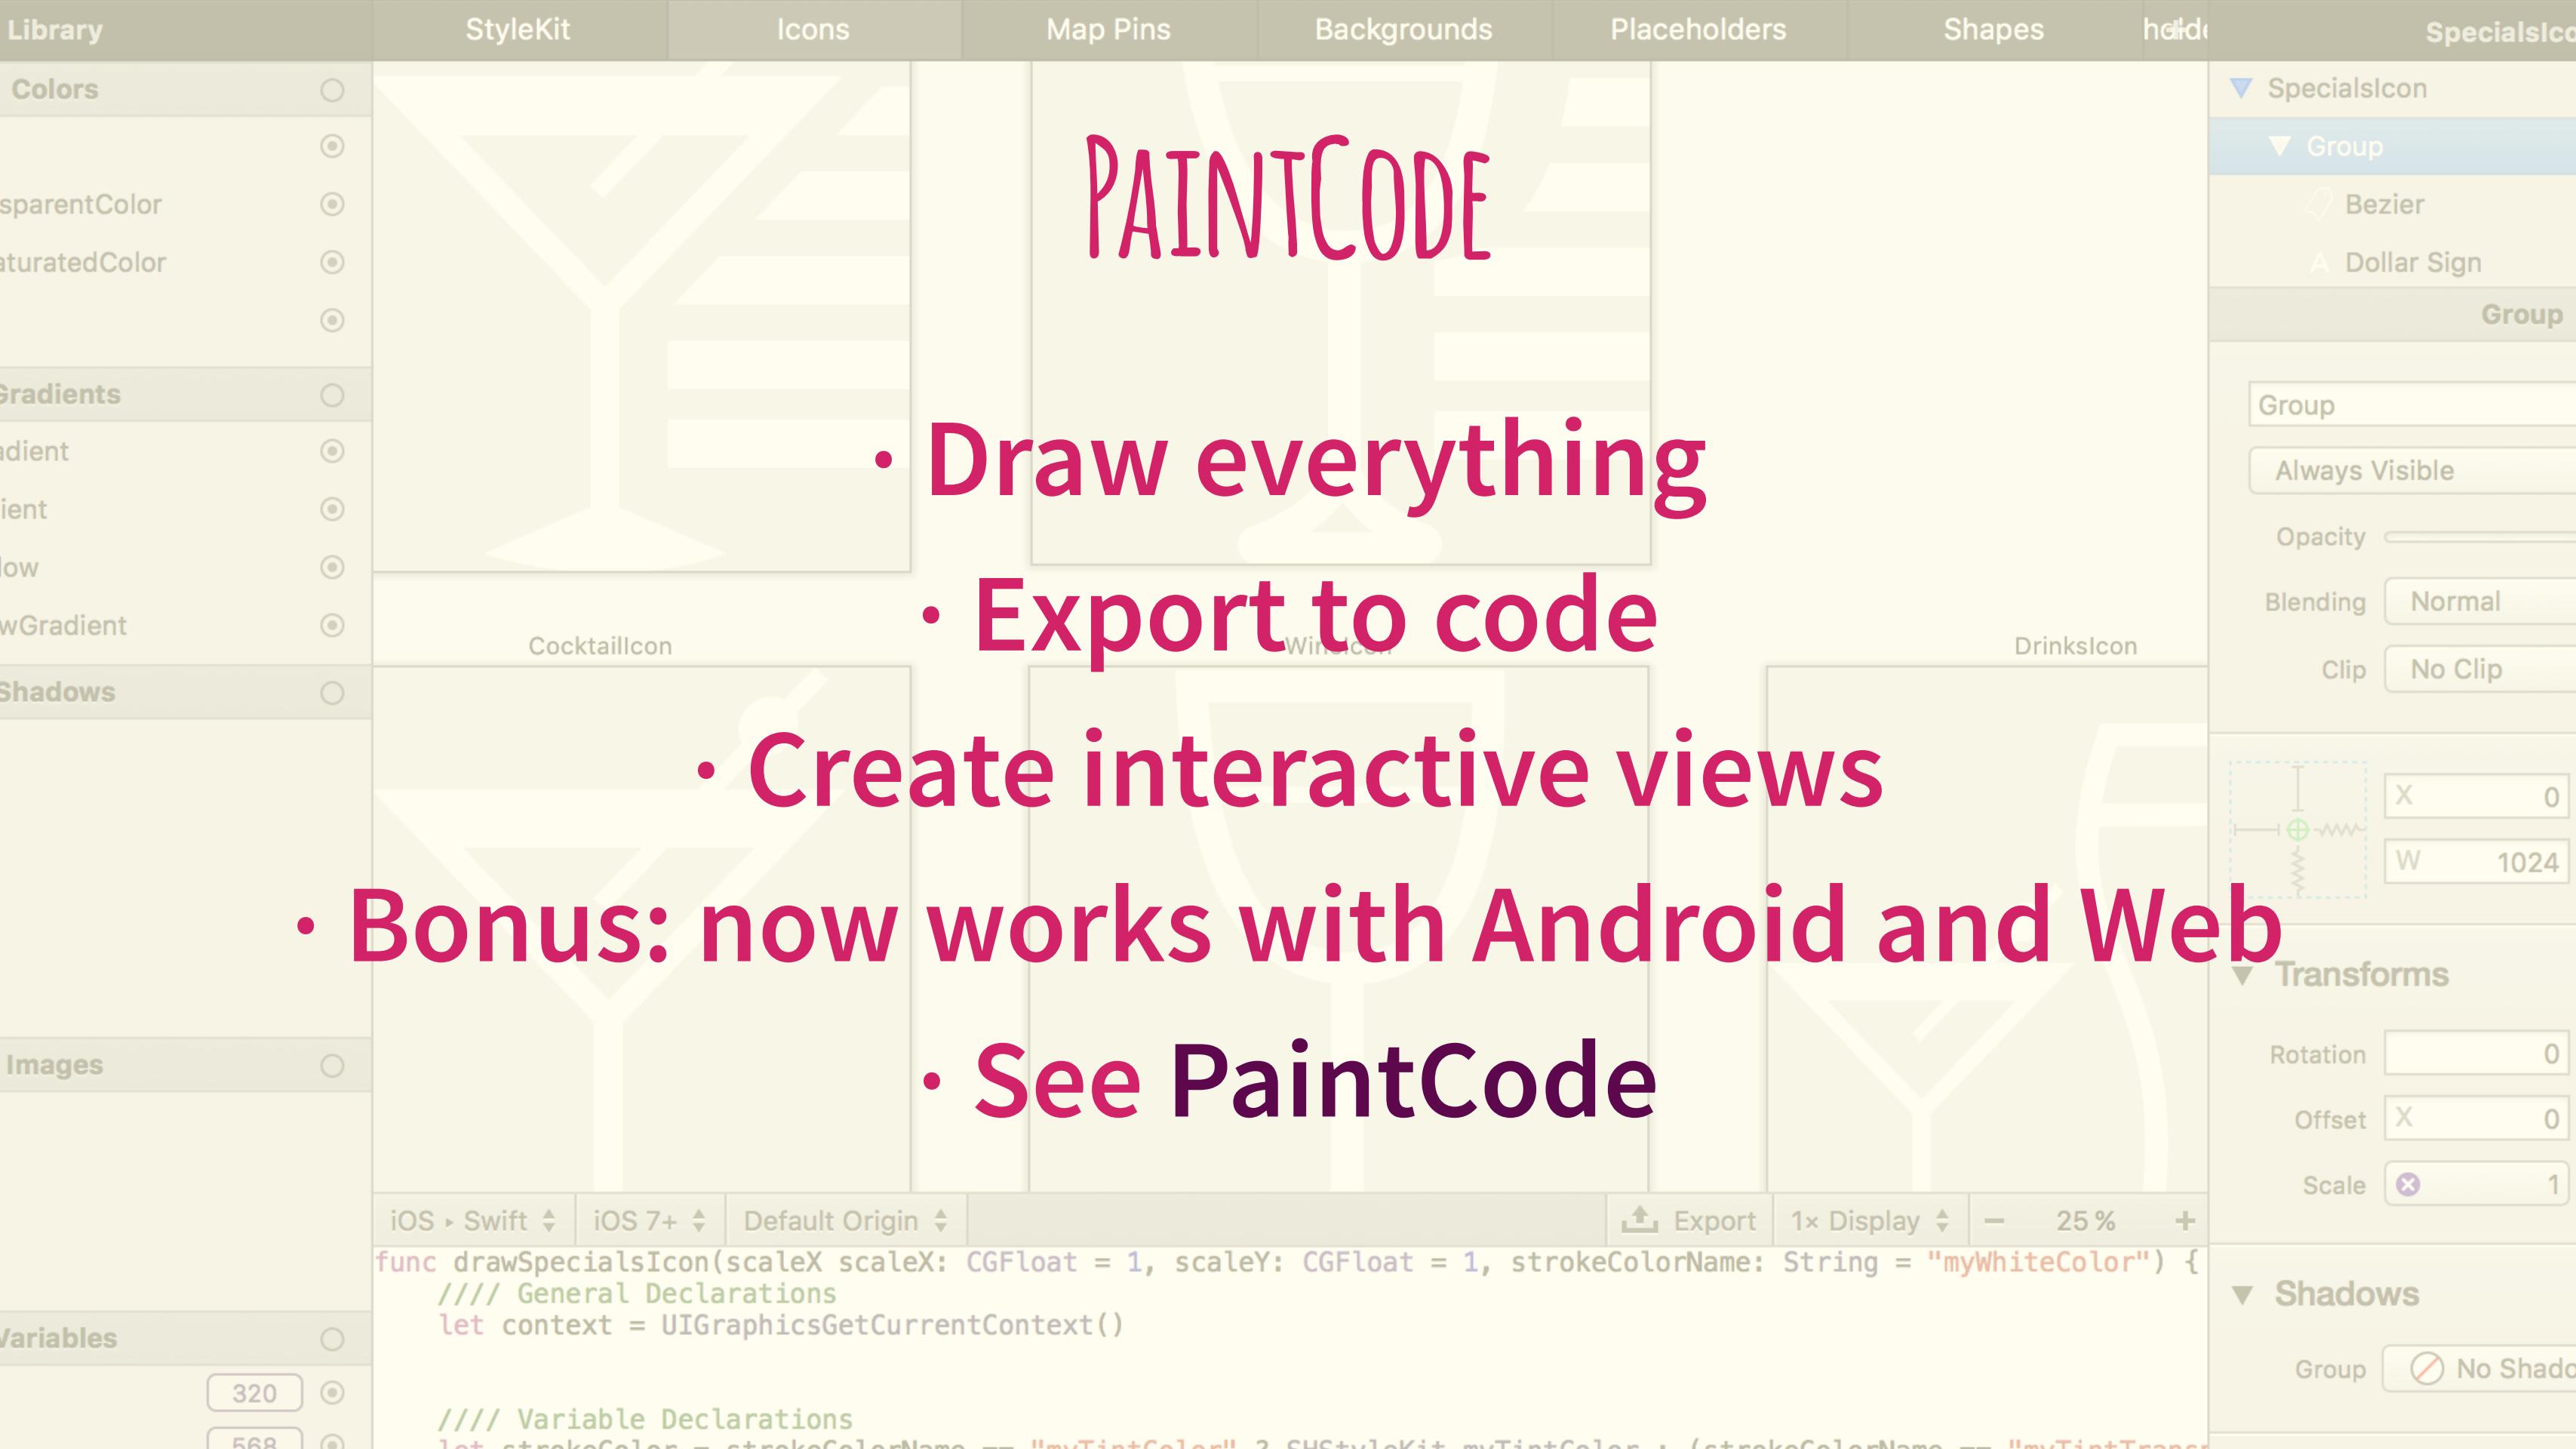

- Create a branch

- Make your changes

- Commit and push

- Send a Pull Request

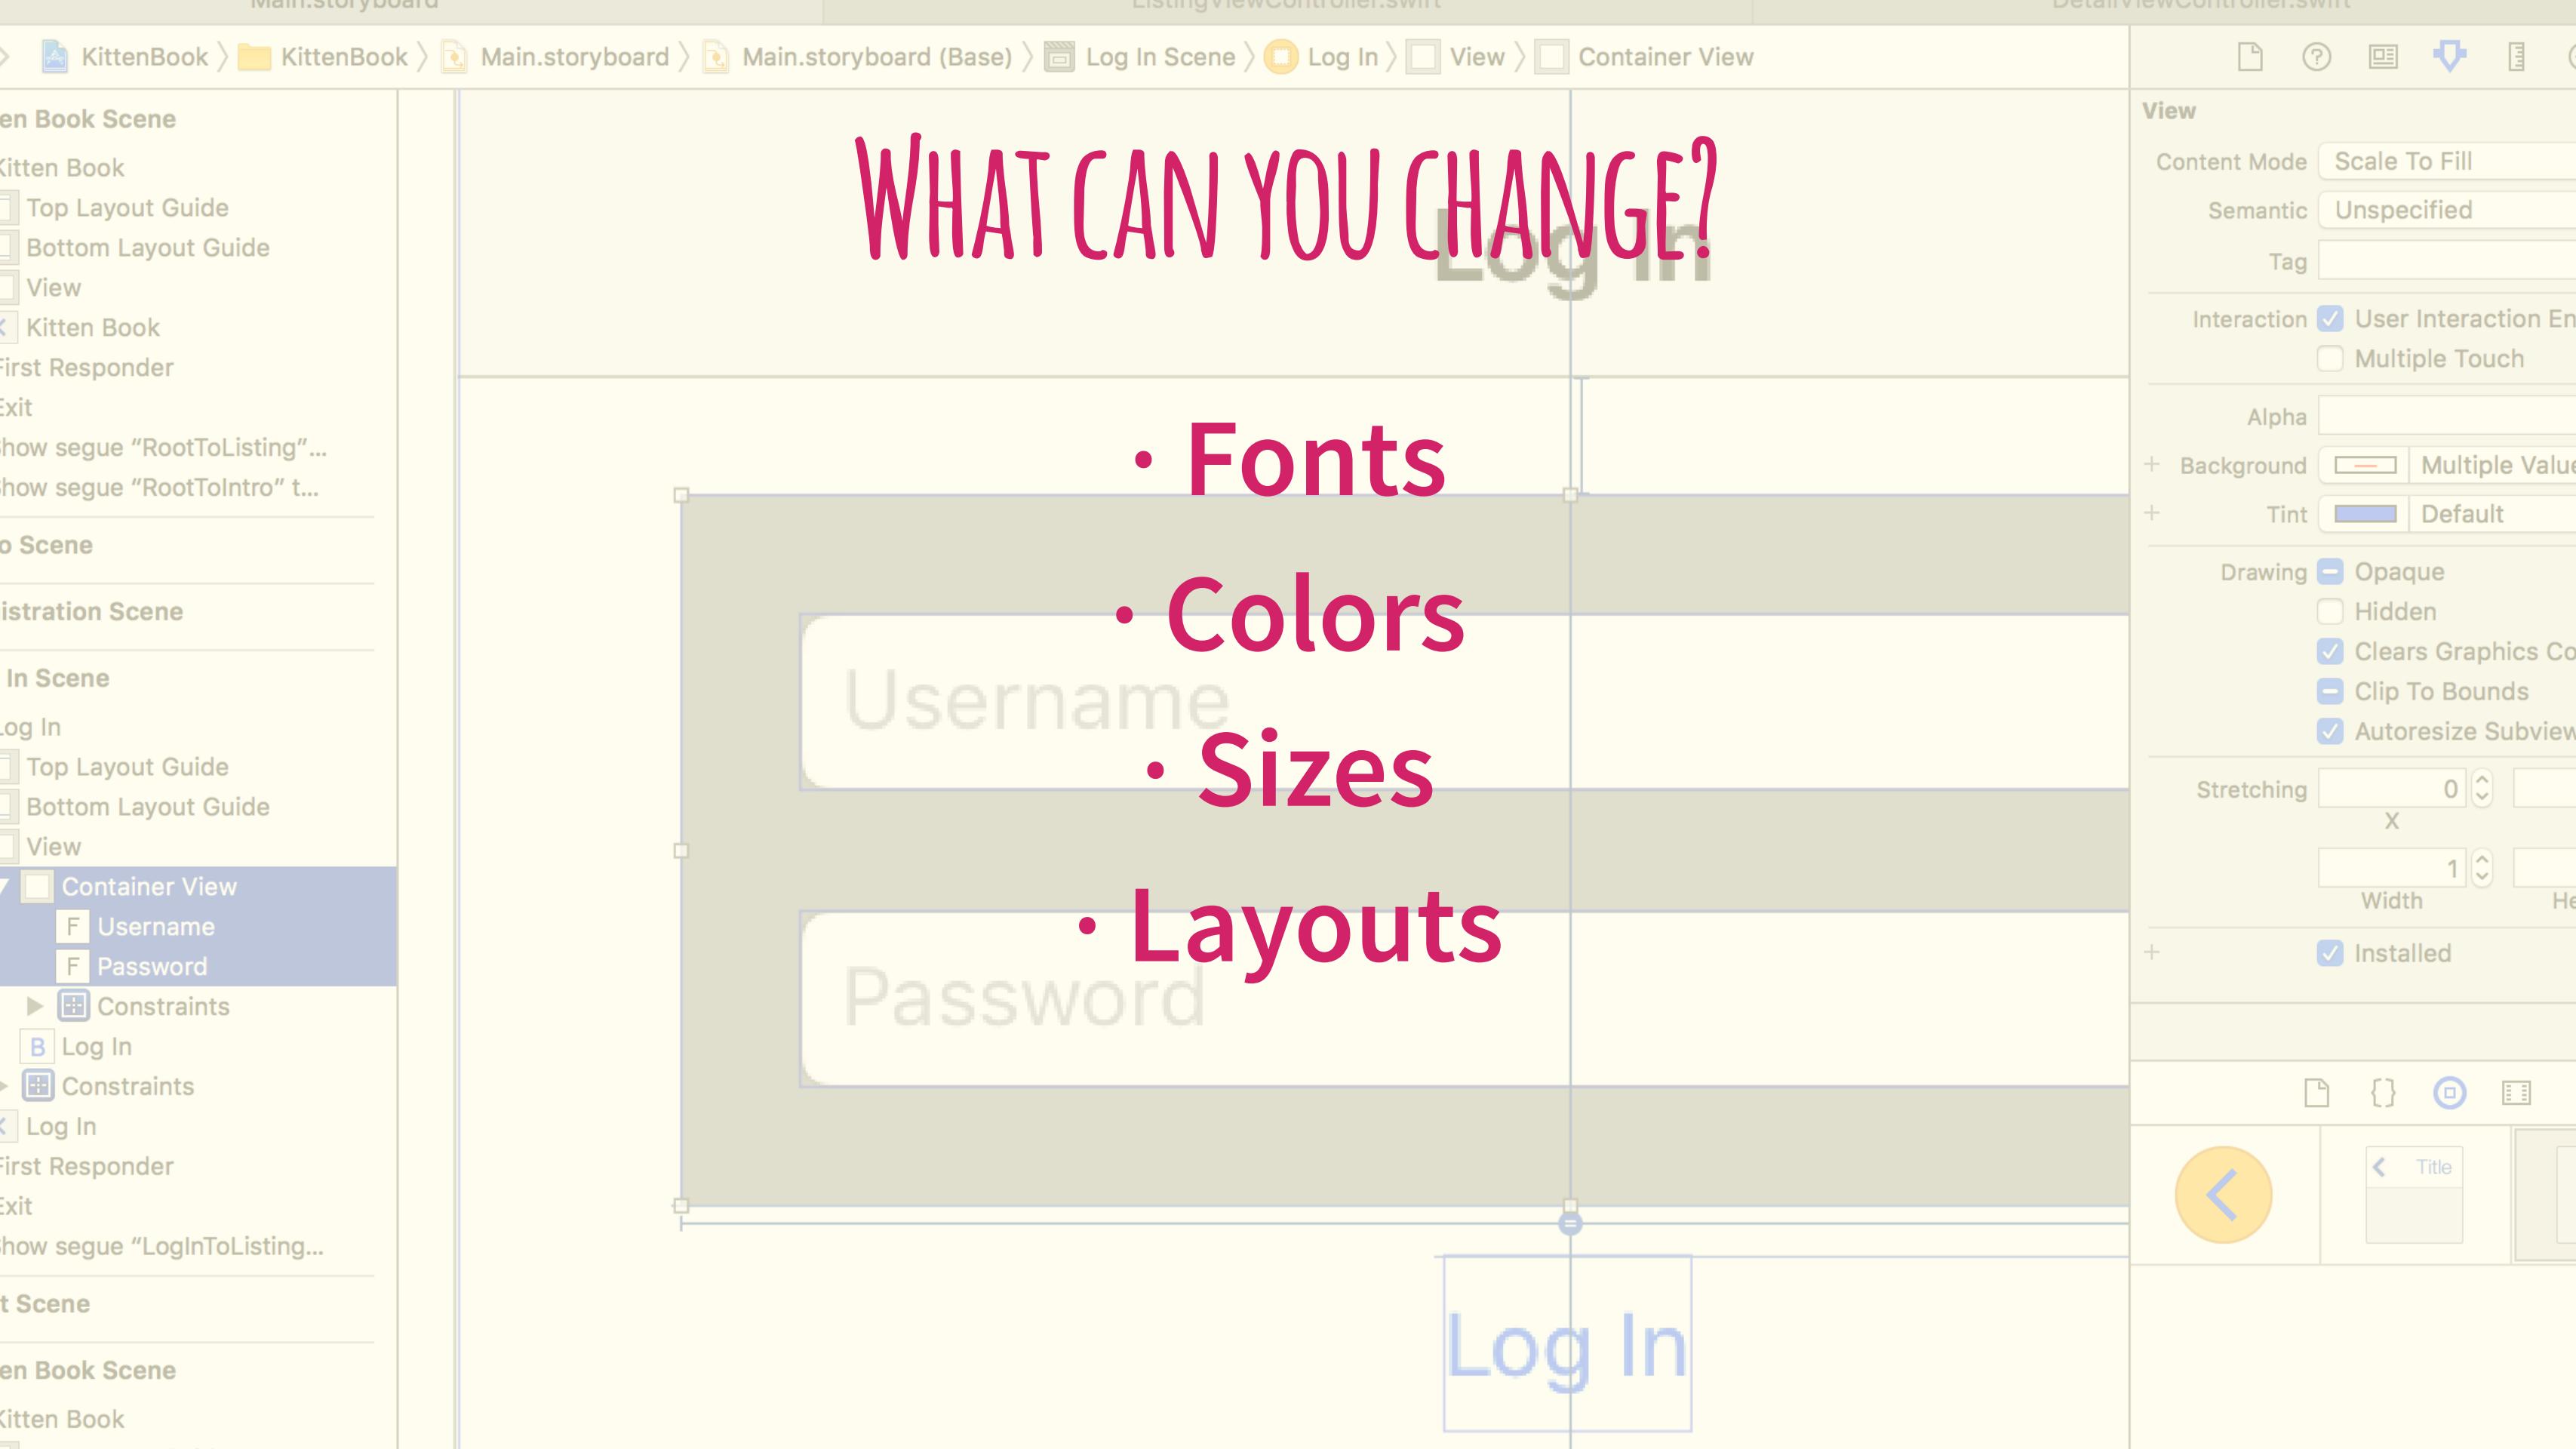

- See GitHub Flow

- Draw everything
    - Export to code
    - Create interactive views
  - Bonus: now works with Android and Web
    - See PaintCode

## PART 2 - ITERATION

- Try the app in the iOS Simulator
- Tweak a screen or change some fonts
  - Reposition some views
  - Change the entire feel of the app

# HOW IS THIS BETTER THAN A BIG SKETCH DOCUMENT?

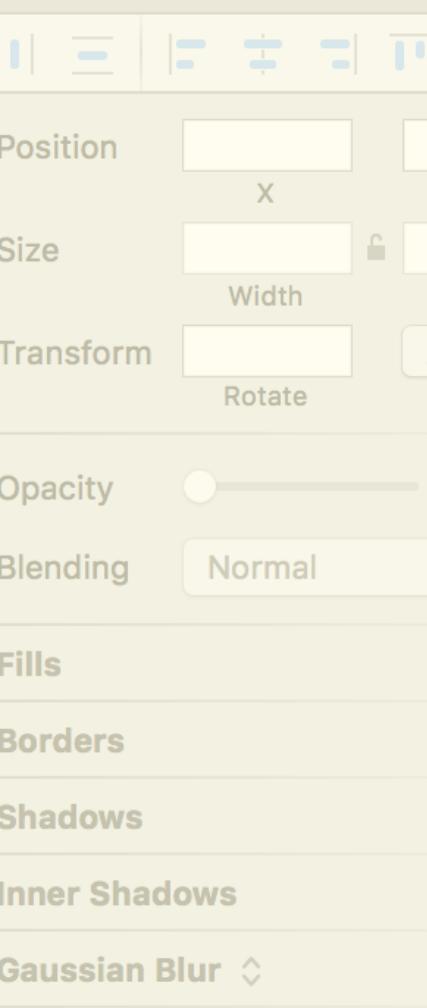

- Make changes directly
- Try small tweaks until you are happy
- No need to involve others
- Share changes when you are ready
- Results will be exactly what you wanted

A woman with blonde hair, wearing a dark top, is smiling at the camera in a kitchen. In the background, a man is standing near a window. The kitchen is well-lit with various items on the counter and shelves.

BUT MOSTLY, IT MAKES YOU HAPPY

- **More about PaintCode**
- **It works with Sketch**
- **It works with PhotoShop**
- **Sync the files on GitHub**
- **Keep using the tools you know and love**
